

IN ONE PARAGRAPH

Wall-Street-Quality Investing, Democratized for Every User.

QUAFI is an AI-powered investment platform that brings **institutional-grade portfolio optimization** to every expertise level — from first-time retail investors to professional analysts. Our proprietary algorithm has been benchmarked against the tools used in sophisticated professional practice and against every major AI system on the market, and **outperforms them all** in rigorous, out-of-sample backtesting. Live today as an optimization and investment-recommendation engine, QUAFI's roadmap adds **in-platform investing and an integrated wallet** once a CNV Agente de Negociación is engaged — letting users invest the optimal allocation directly, with no third-party broker or bank. Built for a Latin American market where fewer than 15% of adults have access to real investment products today.

*"Investment quality should not be a technical or institutional privilege.
QUAFI changes that."*

AGUSTÍN A. SHEHADI C. · PH.D. · FOUNDER & CEO
